

Mconnect® Assistant Call Control Toolbar

What is the Mconnect Assistant Call Control Toolbar?

It is an integrated toolbar that enables users to make and accept telephone calls, and change telephone settings from within Microsoft Outlook and Internet Explorer. The Mconnect Assistant is a lightweight desktop toolbar for everyday users of Internet Explorer and Microsoft Outlook.

Overview

The Mconnect Assistant is a feature-rich desktop toolbar with user controls to access voice services efficiently, that is fully integrated with the Mconnect platform. The toolbar delivers the following features and benefits to users:

- Integration with Microsoft Outlook allowing outbound click-to-dial from Outlook contacts and right-click to dial from email messages (offered with Premium Business Package only)
- Suitable for all businesses as well as Small Office/Home Office (SOHO), and high-end residential users
- User manual built into all help functions
- Internet Explorer allows users to highlight any number on a web page number and right-click to dial
- Call notifications with caller identification from Mconnect and Microsoft Outlook directories
- Full call control (answer or soft pickup, hold, end, 3-way conference and transfer or retrieve voicemail)
- Easily change telephone settings such as Simultaneous Ring, Call Forward All, Call Forward No Answer, Call Forward Busy, Do Not Disturb, and Remote Office
- Internet Explorer allows automatic log-in to your web portal
- View group and personal directories
- View Call History

Make and receive all those phone calls now at the click of a button. Call now to sign-up for service or go to www.mconnectinc.com and sign-up online.
